

Nissan Consult-III Plus Kit

The Consult-III Plus is the new diagnostic interface designed to be compatible with current and future Nissan® and Infiniti® vehicles. After consulting with technicians and service professionals during development of the Consult-III Plus, Nissan® has made several significant improvements to the Consult-III in terms of software, hardware, and functionality.

The Consult-III Plus is required for all 2013 and newer Nissan® and Infiniti® vehicles. In addition, the Consult-III Plus is required for all: 2011 and newer Nissan® LEAF, Quest, and Murano CrossCabriolet vehicles; 2012 and newer Nissan® GT-R and NV vehicles; and 2012 and newer Infiniti® M and M Hybrid vehicles. The Consult-III Plus software is continuously being updated to accommodate new vehicles as well as older model years dating back as far as 1996.

The optional Wireless Measurement Interface Kit (MI) is used for measuring analog data such as voltages and resistances. It can also perform oscilloscope functions. The Consult-III Plus MI uses probes to measure data and communicates it wirelessly, or using a USB cable, to the laptop.

Software & Options:

- Online Subscription for Diagnostic and Reprogramming
- Online ASIST Subscription for Manuals and Service Information
- Optional Immobilizer and Key Functions (Requires Locksmith License)
