

ANNOUNCING wiTECH™ AFTERMARKET SYSTEM

Chrysler's New State-of-the-art wiTECH™ Diagnostic System!

The wiTECH™ Diagnostic System provides the latest secure wireless technology and significant hardware and software performance enhancements over the current *StarSCAN* and *StarMOBILE* tools. This cutting edge technology will enable technicians to increase their productivity and provide world-class diagnostic services to your customers.

ANNOUNCING wiTECH™ AFTERMARKET SYSTEM

The new wiTECH™ Diagnostic Application is a significant improvement over the existing *StarMOBILE* PC software it replaces. It's more intuitive, faster, and provides access to both vehicle data and service information* at the same time. It connects to both *StarMOBILE* devices and the new wiTECH™ VCI Pod.

* Requires TechAuthority online login.

- Richer Graphical Interface
- Easier-To-Use
- Faster Information Delivery

The wiTECH™ VCI Pod allows communication to the vehicle, similar to a *StarMOBILE* device, but at less than half the cost. Multiple wiTECH™ VCI Pods and *StarMOBILE* devices can be supported by a single wiTECH™ Access Gateway.

- More Secure
- More Affordable
- Better Supported

The wiTECH™ Access Gateway is a diagnostic tool network that provides secure, reliable wireless communications capability and firewall protection, taking the burden of tool network setup out of the hands of the technician.

- Secure, Reliable Network
- Supports Multiple wiTECH™ VCI Pods and *StarMOBILE* Devices At Once
- Better Supported
